NOTE: Low weight births are defined as births under 2,500 grams (5 pounds 8 ounces). First trimester care includes prenatal care begun in first 13 weeks of pregnancy. Pregnancy rates shown are per 1,000 females. Death rates shown are per 100,000 persons and are age-adjusted to the 2000 U.S. standard population. Based on a 95 percent confidence interval, ">" indicates a significantly higher than state rate, "<" indicates a significantly lower than state rate. See *Basic Definitions* in the Virginia Health Statistics Annual Report for further information on confidence intervals and age-adjusted rates.
